

lightwait

Iteration 2 - Release

April 22, 2014

Adrian Hernandez

Patrick Leopard II

Luke Oglesbee

Alec Siems

Ryan Sligh

Joe St. Angelo

Summary

Everything on the website should be completely functional with the exception of the admin data page which is currently a shell with little functionality. Only small amount of energy was put toward styling in this iteration. We will gladly take feedback on styling, but it is most important to us that different user modes work individually as well as in conjunction with one another.

Resources

Production Website: <http://lightwait.alectsiems.com>

Github Repository: <https://github.com/moosemn456/lightwait>

The best way to raise concerns is by creating an issue in our github repository. If you need anything that cannot be satisfied there, please utilize the following contacts:

Alec Siems - production server manager/primary database contact
asiems@smu.edu
469-878-0665

Patrick Leopard II - primary iOS contact
pleopard@smu.edu
318-401-5430

Luke Oglesbee - primary GUI contact
loglesbee@smu.edu
832-217-8847

Premade Accounts

Customer

Not necessary because you can create your own user account on the website or on the mobile app.

Chef

email: charlie@smu.edu
password: lightwait
first: Charlie

last: Chef
phone: 555-555-5555

email: charise@smu.edu
password: lightwait
first: Charise
last: Chef
phone: 666-666-6666

Administrator

email: adam@smu.edu
password: lightwait
first: Adam
last: Admin
phone: 777-777-7777

email: adele@smu.edu
password: lightwait
first: Adele
last: Admin
phone: 888-888-8888

Customer (Mobile iOS)

In order to test the iOS app, testers must contact Patrick Leopard II. The app will most likely not run on other computers due to code signing issues.

Order

- View custom order ingredients
- Create and place an order
- See that the order is placed in the queue
- Receive a push notification when the order is complete

Grab 'N Go

- View Grab 'N Go menu
- View placeholder information

Saved Orders

- View and place saved orders

Account

- Create an account
- Log in to an account

Customer (Web)

Order

- Place an order
- Ensure that the order shows up in the queue
- Ensure that items marked unavailable cannot be selected

Account

- Edit account information

Chef (Web)

Queue

- View orders
- Bump orders
- Recall orders
- Navigate order windows
- Ensure that the orders customers place show

Availability

- Change the availability of items
- Customers should not be able to order an item that is not available

Administration (Web)

Menu

- Add items to the menu
- Ensure that added items show up when customers order
- Delete is not supported in this iteration (contact Alec Siems if you need things changed or reset in the database.)
- Mark an item as unavailable

Data

- Submitting queries is not currently supported
- Graph values are currently meaningless and static
- Navigate between simple and advanced search
- Navigate between graph types
- Add and remove query groups in advanced query mode

Users

- Create a new administrator account
- Create a new chef account
